

## Ratings Range

400/230 V - 50 Hz

|         |     |     |
|---------|-----|-----|
| Standby | kW  | 176 |
|         | kVA | 220 |
| Prime   | kW  | 160 |
|         | kVA | 200 |

## Benefits and features

### Rehko premium quality

- Design offices using the latest technical innovations
- Modern fully certified factories
- A cutting edge laboratory
- The generating set, its components and a wide range of options have been fully developed, prototype tested, factory built, and production tested
- Approved for use with HVO (Hydrotreated Vegetable Oil) according to EN15940

### Rehko premium performances

- Optimized and certified sound levels
- Reliable power, even in extreme conditions
- Optimized fuel consumption
- Compact footprint
- Best quality of electricity, high starting and loading capacity, according to ISO8528-5
- Robust base frames and high-quality enclosures
- Protection of installations and people
- Approved in line with the most stringent standards

### Engines

- Rehko Premium level engines
- High power density, small footprint
- Low temperature starting capability
- Long maintenance interval

### Alternator

- Provide industry leading motor starting capability
- Built with a class H insulation and IP23

### Cooling

- A compact and complete solution using a mechanically driven radiator fan
- Designed or optimized by Rehko
- High temperature and altitude product capacity available

### Base frame and enclosure

- High quality steel with enhanced corrosion resistance
- Highly durable QUALICOAT-certified epoxy paint
- Minimum 1500 hours of resistance to salt spray in accordance with ISO12944
- Ergonomic access to allow easy maintenance and connection of the generator
- Robust design optimized for transportation

## Generator sets ratings

## General Specifications

|                                    |                                                     |

## Engine Specifications

|                                          |                 |
|------------------------------------------|-----------------|
| Engine brand                             | REHLKO          |
| Engine ref.                              | KD83L06T-AA56A* |
| Air inlet system                         | Turbo           |
| Cylinder configuration                   | 6 - L           |
| Displacement (l)                         | 8,27            |
| Bore (mm) x Stroke (mm)                  | 114 x 135       |
| Compression ratio                        | 16.7:1          |
| Speed 50Hz (RPM)                         | 1500            |
| Maximum stand-by power at rated RPM (kW) | 203             |

|                                        |            |
|----------------------------------------|------------|
| Governor type                          | Electronic |
| Frequency regulation, steady state (%) | 0,5        |

## Lubrication System

|                                  |             |
|----------------------------------|-------------|
| Oil Filter Quantity and type**** | Spin On / 1 |
| Charge Air coolant               | Air/Air     |

\*\*\*\*Rehiko recommends the use of genuine oil and filters.

## Fuel System

|                              |                              |
|------------------------------|------------------------------|
| Maximum fuel pump flow (l/h) | 83                           |
| Fuel filter: Qty, type       | 1 / 1                        |
|                              | Primary Engine Filter / Fuel |
|                              | Water Separator              |
| Fuel                         | Diesel Fuel                  |

\* Engine reference may be partially modified depending on genset application, options selected by the customer and lead time required.

## Consumption with cooling system

|                                           |    |
|-------------------------------------------|----|
| Fuel consumption @ ESP Max Power (l/h)    | 51 |
| Fuel consumption @ PRP Max Power (l/h)    | 45 |
| Fuel consumption @ 75% of PRP Power (l/h) | 32 |
| Fuel consumption @ 50% of PRP Power (l/h) | 22 |

## Cooling system

|                                            |                 |
|--------------------------------------------|-----------------|
| Radiator & Engine capacity (l)             | 30,8            |
| Fan power 50Hz (kW)                        | 8,26            |
| Fan air flow w/o restriction (m3/s)        | 2,5             |
| Available restriction on air flow (mm H2O) | 15              |
| Type of coolant                            | Glycol-Ethylene |
| Radiated heat to ambient (kW)              | 26              |
| Heat rejection to coolant HT (kW)          | 95              |
| Coolant capacity HT, engine only (l)       | 12,3            |
| Max coolant temperature, Shutdown (°C)     | 104             |
| Thermostat begin of opening HT (°C)        | 82              |
| Thermostat end of opening HT (°C)          | 95              |

## Exhaust system

|                                    |     |
|------------------------------------|-----|
| Exhaust gas temperature @ ESP (°C) | 587 |
| Exhaust gas flow @ ESP (l/s)       | 592 |

## Electrical system

|                     |    |
|---------------------|----|
| Battery voltage (V) | 12 |
|---------------------|----|

## Air Intake system

|                               |     |
|-------------------------------|-----|
| Combustion air flow (l/s)     | 210 |
| Radiated heat to ambient (kW) | 26  |

## Alternator Specifications

|                                                  |           |
|--------------------------------------------------|-----------|
| Number of pole                                   | 4         |
| Technology                                       | Brushless |
| AVR Regulation                                   | Yes       |
| Insulation class                                 | H         |
| Indication of protection                         | IP23      |
| Number of bearing                                | 1         |
| Number of wires                                  | 06        |
| Coupling                                         | Direct    |
| Overspeed (rpm)                                  | 2250      |
| Voltage regulation at established rating (+/- %) | 0,5       |
| Unbalanced load acceptance ratio (%)             | 8         |

## Alternator standard features

- All models are brushless, rotating-field alternators
- NEMA MG1, IEEE, and ANSI standards compliance for temperature rise and motor starting
- The AVR voltage regulator provides superior short circuit capability
- Self-ventilated and dip proof construction
- Superior voltage waveform

*Note: See Alternator Data Sheets for alternator application data and ratings, efficiency curves, voltage dip with motor starting curves, and short circuit decrement curves.*

## APM303 controller

The APM303 is a versatile unit which can be operated in manual or automatic mode. It offers the following features:

- Measurements: phase-to-neutral and phase-to-phase voltages, fuel level (In option : active power currents, effective power, power factors, Kw/h energy meter, oil pressure and coolant temperature levels)
- Supervision: Modbus RTU communication on RS485
- Reports: (In option : 2 configurable reports)
- Safety features: Overspeed, oil pressure, coolant temperatures, minimum and maximum voltage, minimum and maximum frequency (Maximum active power P<66kVA)
- Traceability: Stack of 12 stored events

For further information, please refer to the data sheet for the APM303

## APM403 controller

The APM403 is a versatile control unit which allows operation in manual or automatic mode

- Measurements : voltage and current
- kW/kWh/kVA power meters
- Standard specifications: Voltmeter, Frequency meter.
- Optional : Battery ammeter.
- J1939 CAN ECU engine control
- Alarms and faults: Oil pressure, Coolant temperature, Overspeed, Start-up failure, alternator min/max, Emergency stop button.
- Engine parameters: Fuel level, hour counter, battery voltage.
- Optional (standard at 24V): Oil pressure, water temperature.
- Event log/ Management of the last 300 genset events.
- Mains and genset protection
- Clock management
- USB connections, USB Host and PC,
- Communications : RS485 INTERFACE
- ModBUS protocol /SNMP
- Optional : Ethernet, GPRS, remote control, 3G, 4G
- Websupervisor, SMS, E-mails

## Codes and Standards

Engine-generators set is designed and manufactured in facilities certified to standards ISO9001:2015 & ISO14001:2015. The generator sets and its components are prototype-tested, factory built and production tested and are in compliance with the relevant standards:

- Machinery Directive 2006/42/EC of May 17th 2006
- EMC Directive 2014/30/UE
- Safety objectives set out in the Low Voltage Directive 2014/35/UE
- EN ISO 8528-13, EN 60034-1, EN 61000-6-1, EN 61000-6-2, EN 61000-6-3, EN 55011, EN 1679-1 et EN 60204-1

## Power ratings definition according to ISO8528-1 (2018-02 edition) and ISO-3046-1

**Emergency Standby Power (ESP):** The standby rating is applicable to varying loads for the duration of a power outage. There is no overload capability for this rating. Average load factor per 24 hours of operation is <70%.

**Prime Power (PRP):** At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour within 12 hour of operation. Average load factor per 24 hours of operation is <70%.

## Standard scope of supply:

All our open gensets are fitted with:

- Industrial water-cooled DIESEL engine
- Engine electronic governor
- Electric starter & charge alternator
- Battery<sup>(1)</sup>
- Standard air filter
- Electric circuit breaker, adapted to the short-circuit current of the generating set
- Single bearing alternator IP 23 T° rise/ insulation to class H/H
- Welded steel base frame with 85% vibration attenuation mounts
- frame height optimized to allow it to be moved safely by forklift
- enclosure made of new high-quality European steel with enhanced corrosion resistance
- enclosures and base frames tested and analyzed by the French Corrosion Institut
- 100% of tanks tested for permeability
- Personal protection ensured by protective grilles on hot and rotating parts
- Separate 9 dB(A) silencer
- Fuel tank welded inside the genset frame
- Retention bund included for gensets up to 250 kVA ESP
- Emergency stop button on the outside
- Flexible fuel lines & lub oil drain cock
- Oil<sup>(2)</sup> and antifreeze liquid<sup>(2)</sup>
- Exhaust outlet with flexible and flanges
- User's manual (1 copy)
- Packing under plastic film

<sup>(1)</sup> excluded from the supply up to 165 kVA ESP if assembled outside Europe

<sup>(2)</sup> excluded from the supply up to 830 kVA ESP if assembled outside Europe

## Dimensions and Weights

### Compact version

|                                     |                    |
|-------------------------------------|--------------------|
| Overall Size, max., L x W x H, (mm) | 2497 x 1103 x 1644 |
| Dry weight (kg)                     | 1760               |
| Tank capacity (L)                   | 344                |

### M149 - Dimensions soundproofed version

|                                                     |                    |
|-----------------------------------------------------|--------------------|
| Overall Size, max., L x W x H, (mm)                 | 3590 x 1147 x 1899 |
| Tank capacity (L)                                   | 344                |
| Dry weight (kg)                                     | 2320               |
| Sound power level guaranteed (Lwa) 50Hz (75% PRP)   | 96                 |
| Acoustic pressure level @1m in dB(A) 50Hz (75% PRP) | 80                 |
| Acoustic pressure level @7m in dB(A) 50Hz (75% PRP) | 70                 |

Reference Conditions: 25°C Air Inlet Temperature, 40°C Fuel Inlet Temperature, 100 kPa Barometric Pressure; 10.7 g/kg of dry air Humidity. Intake Restriction set to maximum allowable limit for clean filter; Exhaust Back pressure set to maximum allowable limit; Fuel density at 0.85 kg/L.

Data was taken from a single engine test according to the test methods, fuel specification and reference conditions stated above and is subjected to instrumentation and engine-to-engine variability. Test conducted with alternate test methods, instrumentation, fuel or reference conditions can yield different results. Data and specifications subject to change without notice.
